DULEVO
INTERNATIONAL
Passion for Technology

1100 - 1300 elite

The man-on-board Dulevo 1100 - 1300 sweepers are designed for the heavy industry and to work in extremely dusty environments. Thanks to their super compact structure, 1100 and 1300 are extremely manoeuvrable, easy and pleasing to drive, whereas their modern and appealing design makes them unique in their own range.

The man-on-board Dulevo 1100 and 1300 sweepers are ideal for any industrial application, and may be implemented with excellent results also in public or movement areas, such as depots, loading/unloading areas, parking lots, etc. The discharge outlet - which is placed on the top - makes it possible to perform the discharge in different containers without running the risk of dirtying oneself.

CHOOSE A 1100-1300 IF:

- You need a machine that collects with the same efficiency both the finest dust and the heaviest and voluminous debris;
- High functionality, and along with an easy control over the machine, you also want a high comfort level;
- You are looking for a highly productive machine, with low maintenance needs;
- You need a heavy machine, of small size, and with the discharge outlet placed on top.

ADVANTAGES:

- Possibility to have them equipped with the exclusive GORE® filter, for a total control over dust;
- 1100 comes upon request as battery, gasoline, or diesel powered, while 1300 comes as electric and diesel;
- Great power, optimum results and excellent exhaustion system;
- Automatic lifting patented system of the side brush in order to prevent it from straining;
- Compacting refuse system in the container.

The industrial sweeper Dulevo 1300 features all an industrial sweeper needs to be productive: Large hopper, high power, outstanding sweeping result and very performing suction system. The action of the brooms throws the dust and the debris into a large capacity hopper. The dust is controlled and aspirated by a powerful turbine that blows clean air through a high performance filter. The dust filter is made of a special filtering fabric that ensures zero dust emission into the environment and releases only clean air.

Ergonomics are a big plus of this rider industrial sweeper. Very few and simple levers makes the machine pleasant to use and quick to learn. Every detail of this rider industrial sweeper has been designed in order to obtain the best cleaning result and low running cost even from inexperienced users. The easy access to all components and the fully hydraulic technology makes maintenance simple and cheap.
